

HUE BÉTON

FLOW. STRENGTH. ELEGANCE.

Who We Are

At HUE BÉTON, we are specialists in Micro Concrete Solutions, crafting seamless, custom-designed surfaces that blend aesthetics with performance. Our expertise lies in transforming ordinary spaces into modern, elegant environments—whether it's for residential, commercial, or architectural projects. Every surface we create is a testament to precision, artistry, and innovation.

Concrete Engineering

Micro concrete is more than just a finish—it's an advanced material engineered for durability, flexibility, and seamless integration. HUE BETON applies cutting-edge concrete technology to floors, walls, and ceilings, ensuring surfaces that are not only visually stunning but also highly resilient. Our proprietary application techniques create a smooth, uninterrupted flow, enhancing both form and function while maintaining the raw beauty of concrete.

Deployment

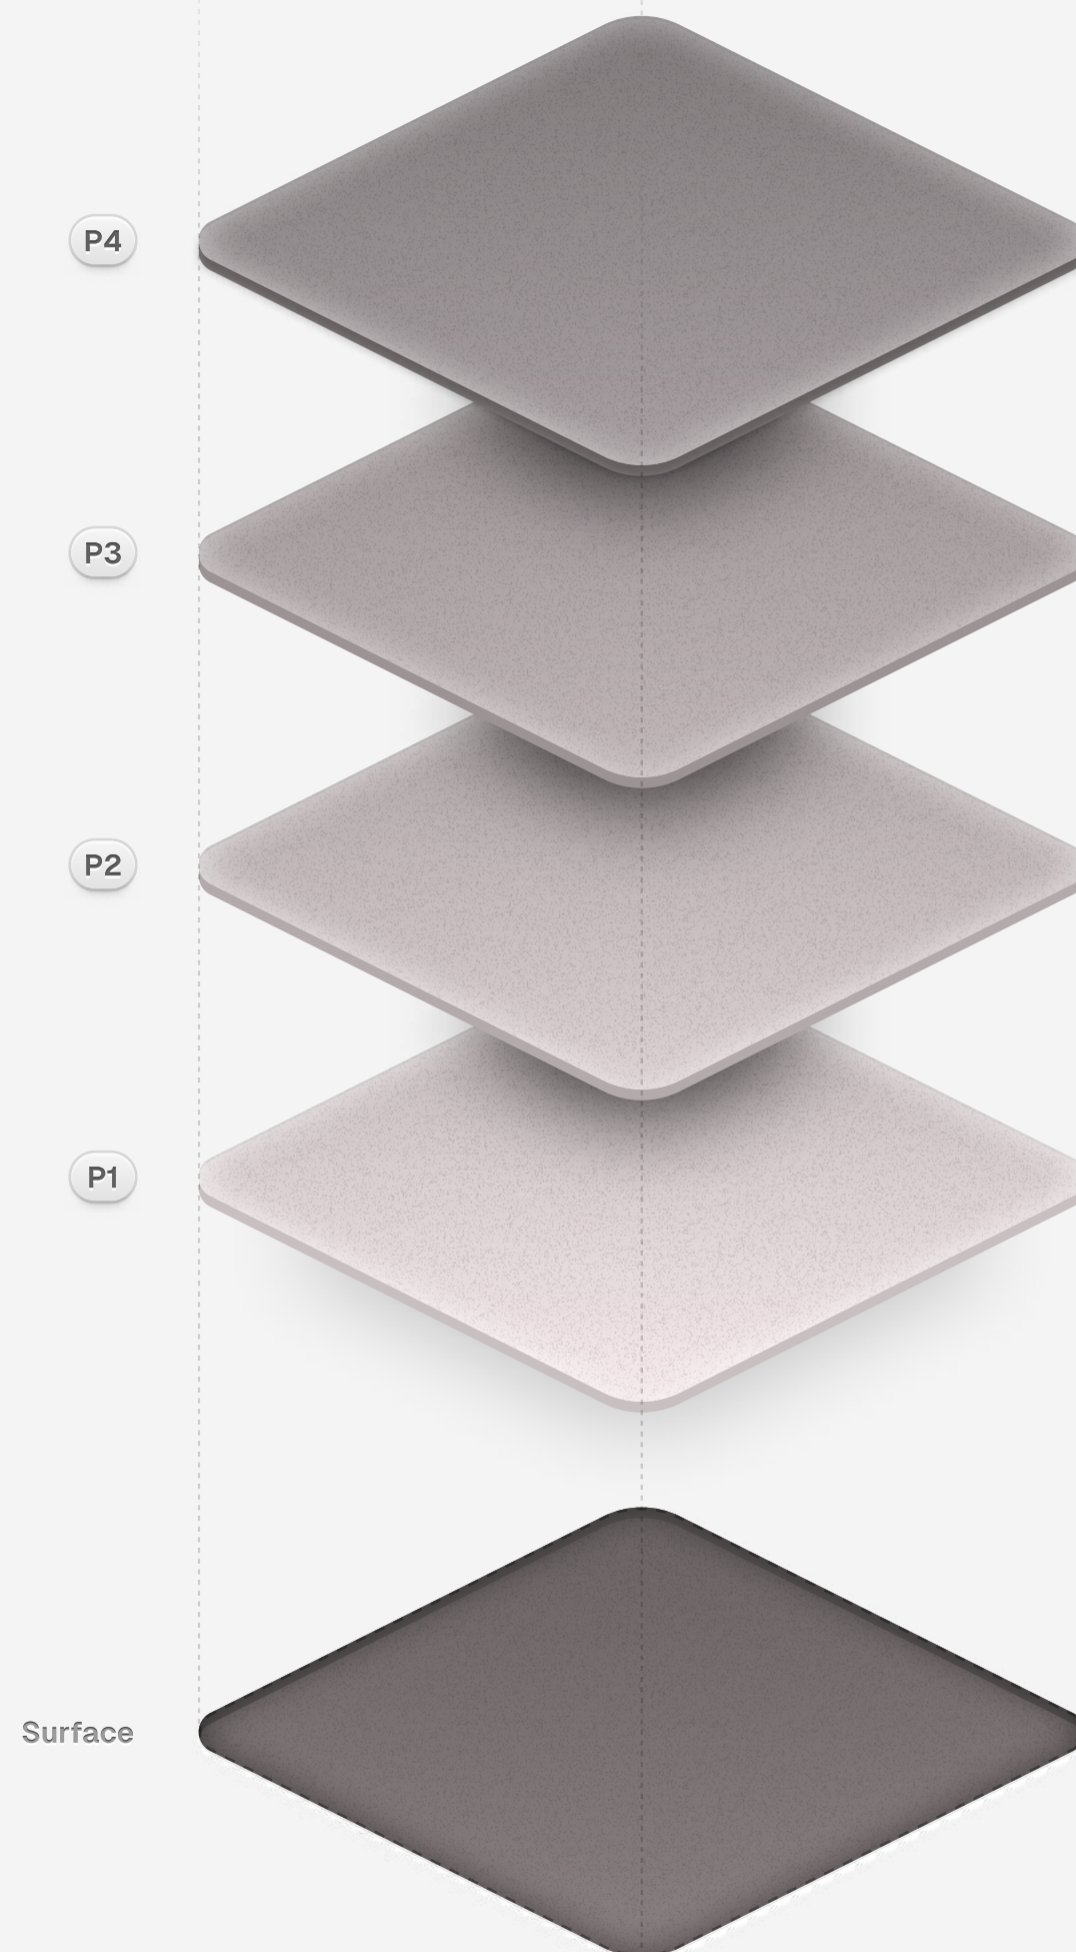

At HUE BETON, our deployment process follows a meticulous multi-layer system designed for durability and seamless aesthetics. Typically, 3 to 4 layers are applied, depending on the surface type and the finish specified by the architect.

Each layer is precisely sanded using advanced equipment to ensure a smooth, uniform surface. This structured approach enhances both strength and texture. Once the desired smoothness is achieved, high-performance sealers are applied to protect and preserve the finish.

Micro-Top is more than a surface treatment—it's a refined expression of modern design. At just 2mm thick, it offers exceptional strength and adhesion, making it ideal for kitchens, bathrooms, and living spaces alike.

Key Features

- ✔ Ultra-thin yet high-strength application
- ✔ Suitable for high-traffic areas
- ✔ Allows for on-site concrete renovation
- ✔ Provides a seamless, colorfast, and durable surface

Our Process

Achieving a seamless finish is an art—one that demands precision, expertise, and meticulous craftsmanship.

Here's how we bring it to life:

P1 Base Coat Application & Sanding

The foundation of durability. We apply the first layer of micro concrete to create a strong base, followed by careful sanding for a smooth surface.

P2 Second Coat Application & Sanding

A refined touch. The second layer enhances texture and uniformity, ensuring an even and well-prepared surface before the final finish.

P3 Finish Coat Application & Sanding

Bringing the aesthetics to life. The finish coat is applied to achieve the desired texture and tone, followed by detailed sanding for a seamless look.

P4 Densification & Sealing

The ultimate protection. We apply a high-performance sealer to enhance durability, water resistance, and stain protection—ensuring a long-lasting, elegant surface.

Product Line

At HUE BETON, we offer a diverse range of micro concrete solutions, designed to enhance aesthetics, durability, and functionality across various applications.

Flooring

Walls & Ceilings

Bathrooms

Furniture & Countertops

Outdoor & Facades

Whether for renovation or new construction, our micro concrete solutions offer unparalleled versatility and performance.

Flooring

Seamless, durable, and modern—our micro concrete flooring offers a sleek, joint-free surface that enhances any space. Designed for both residential and commercial applications, it provides a high-strength, low-maintenance finish that withstands daily wear while maintaining its refined aesthetic.

HUE BÉTON

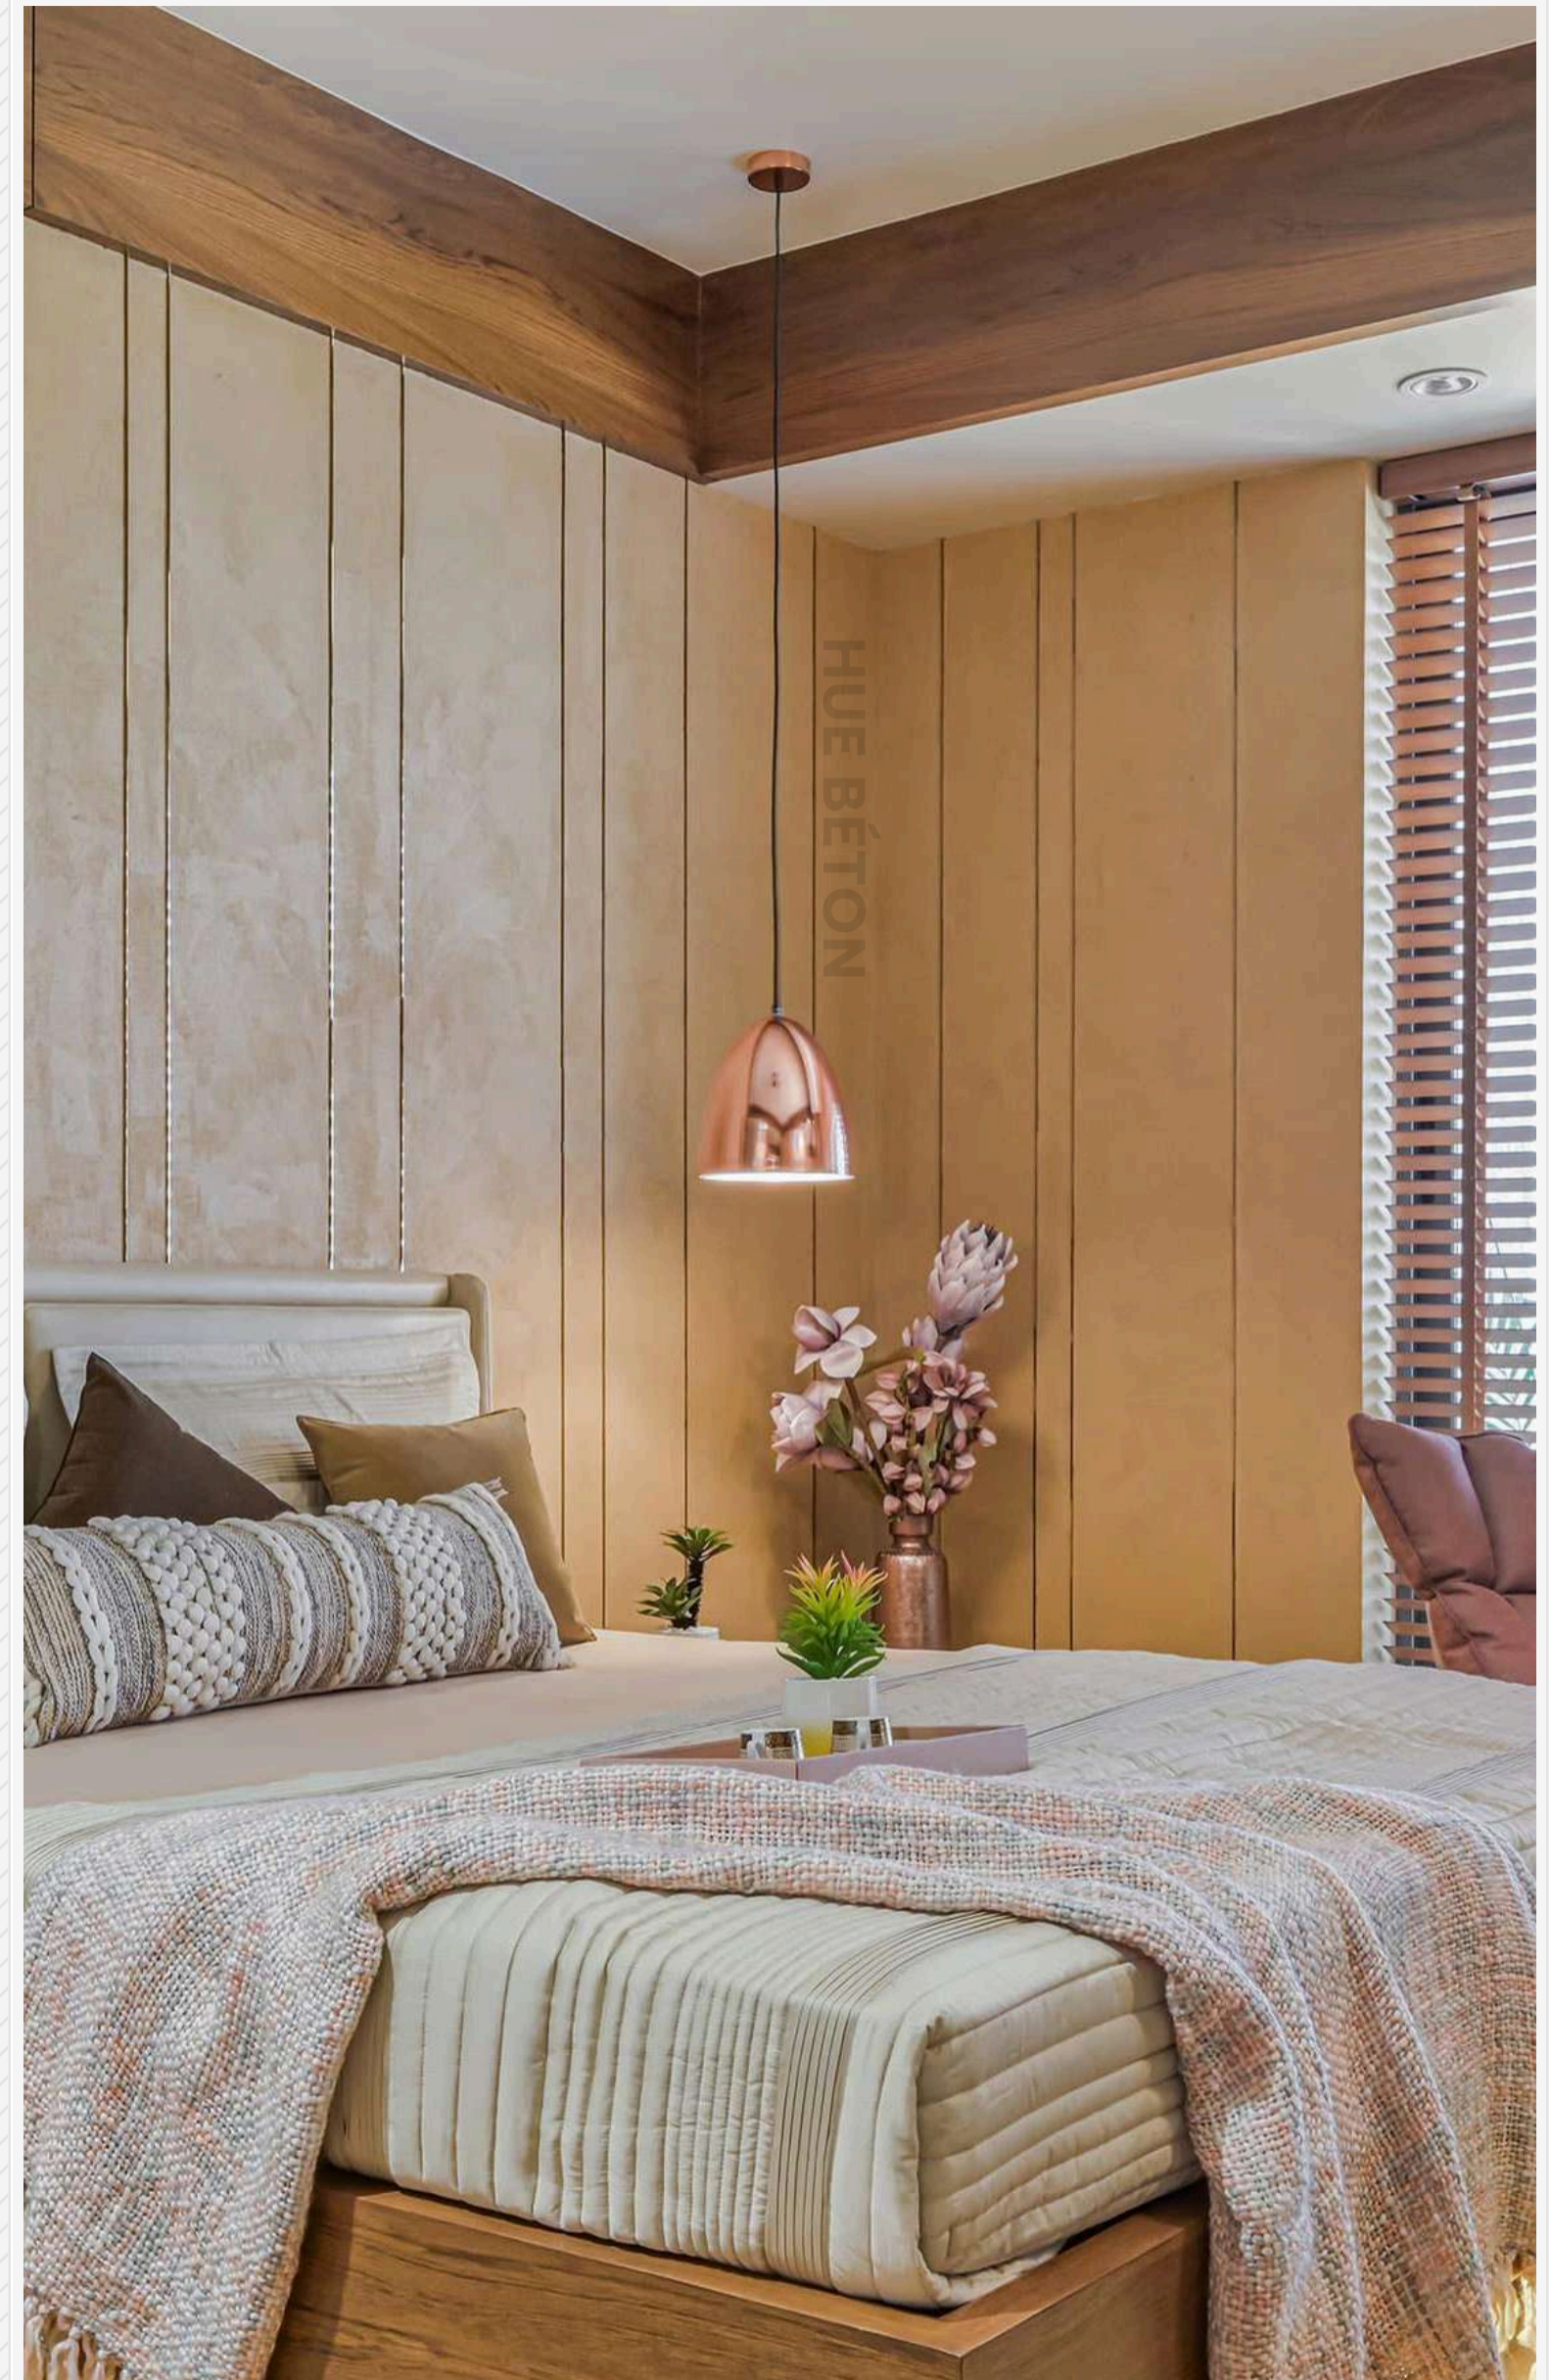

HUE BÉTON

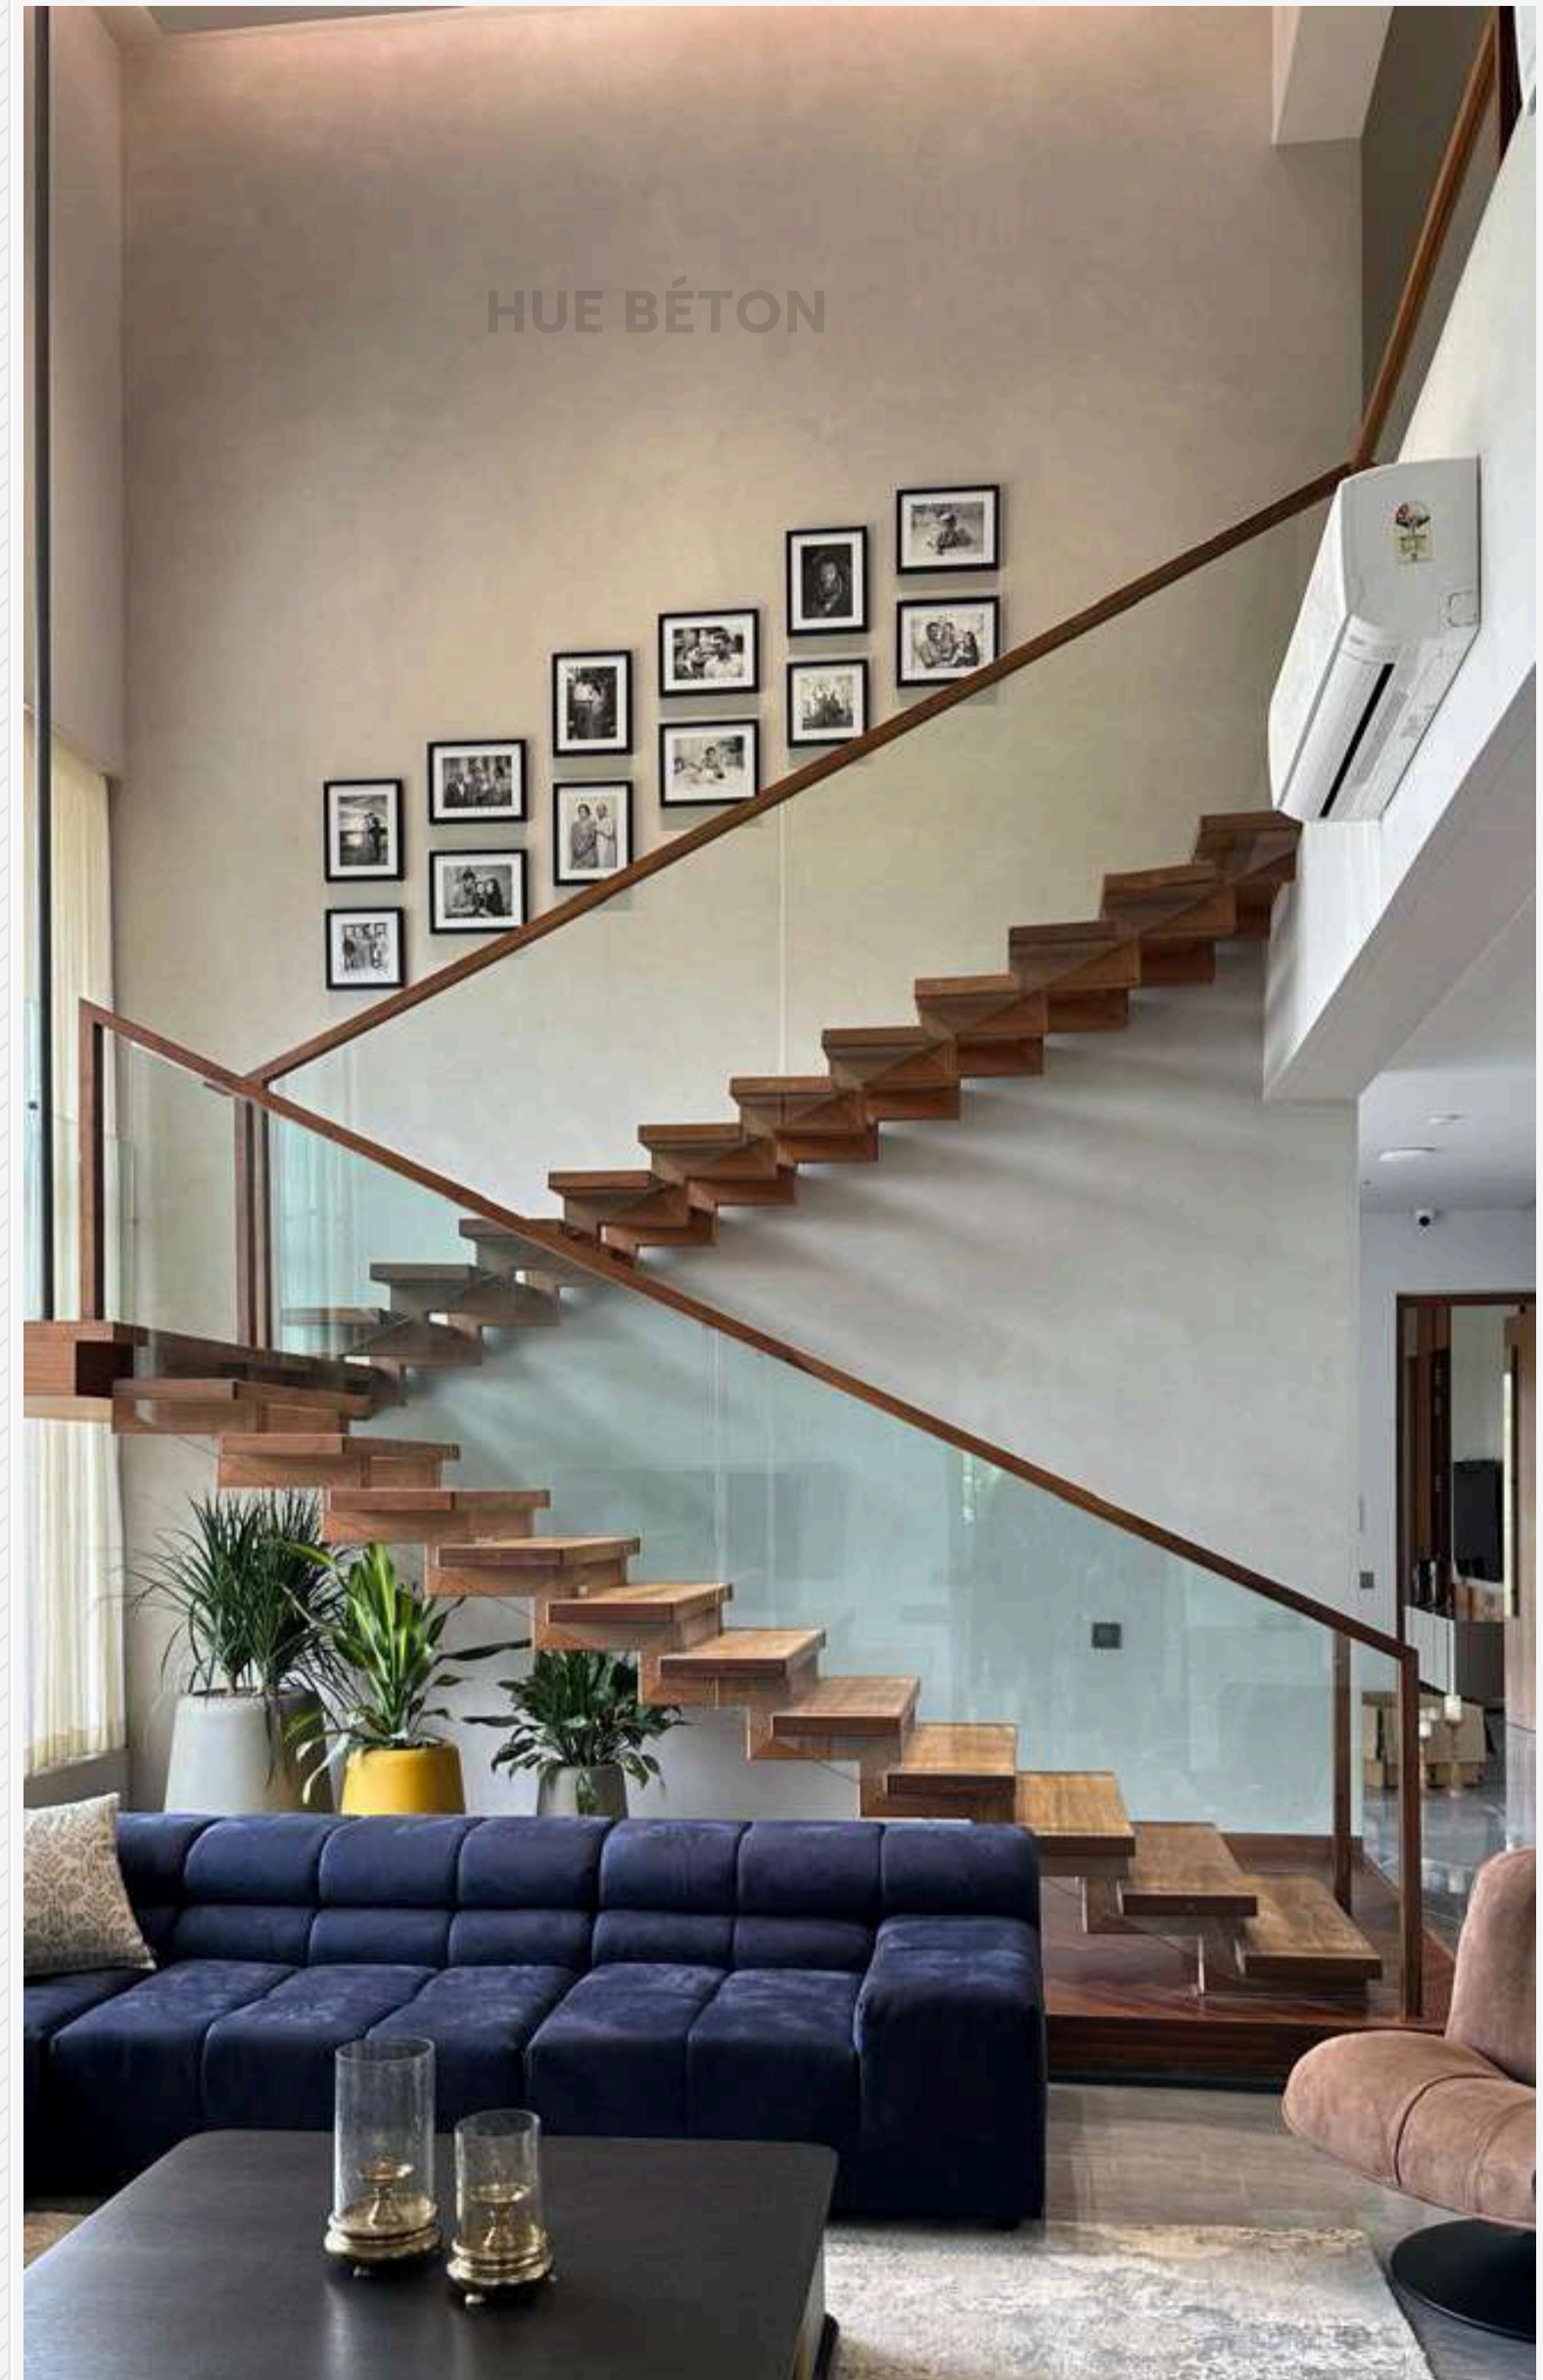

Walls & Ceilings

Transform interiors with a smooth, elegant surface that brings texture and depth to walls and ceilings. Our micro concrete finishes create a sophisticated, uninterrupted flow, enhancing both contemporary and minimalist spaces with a timeless appeal.

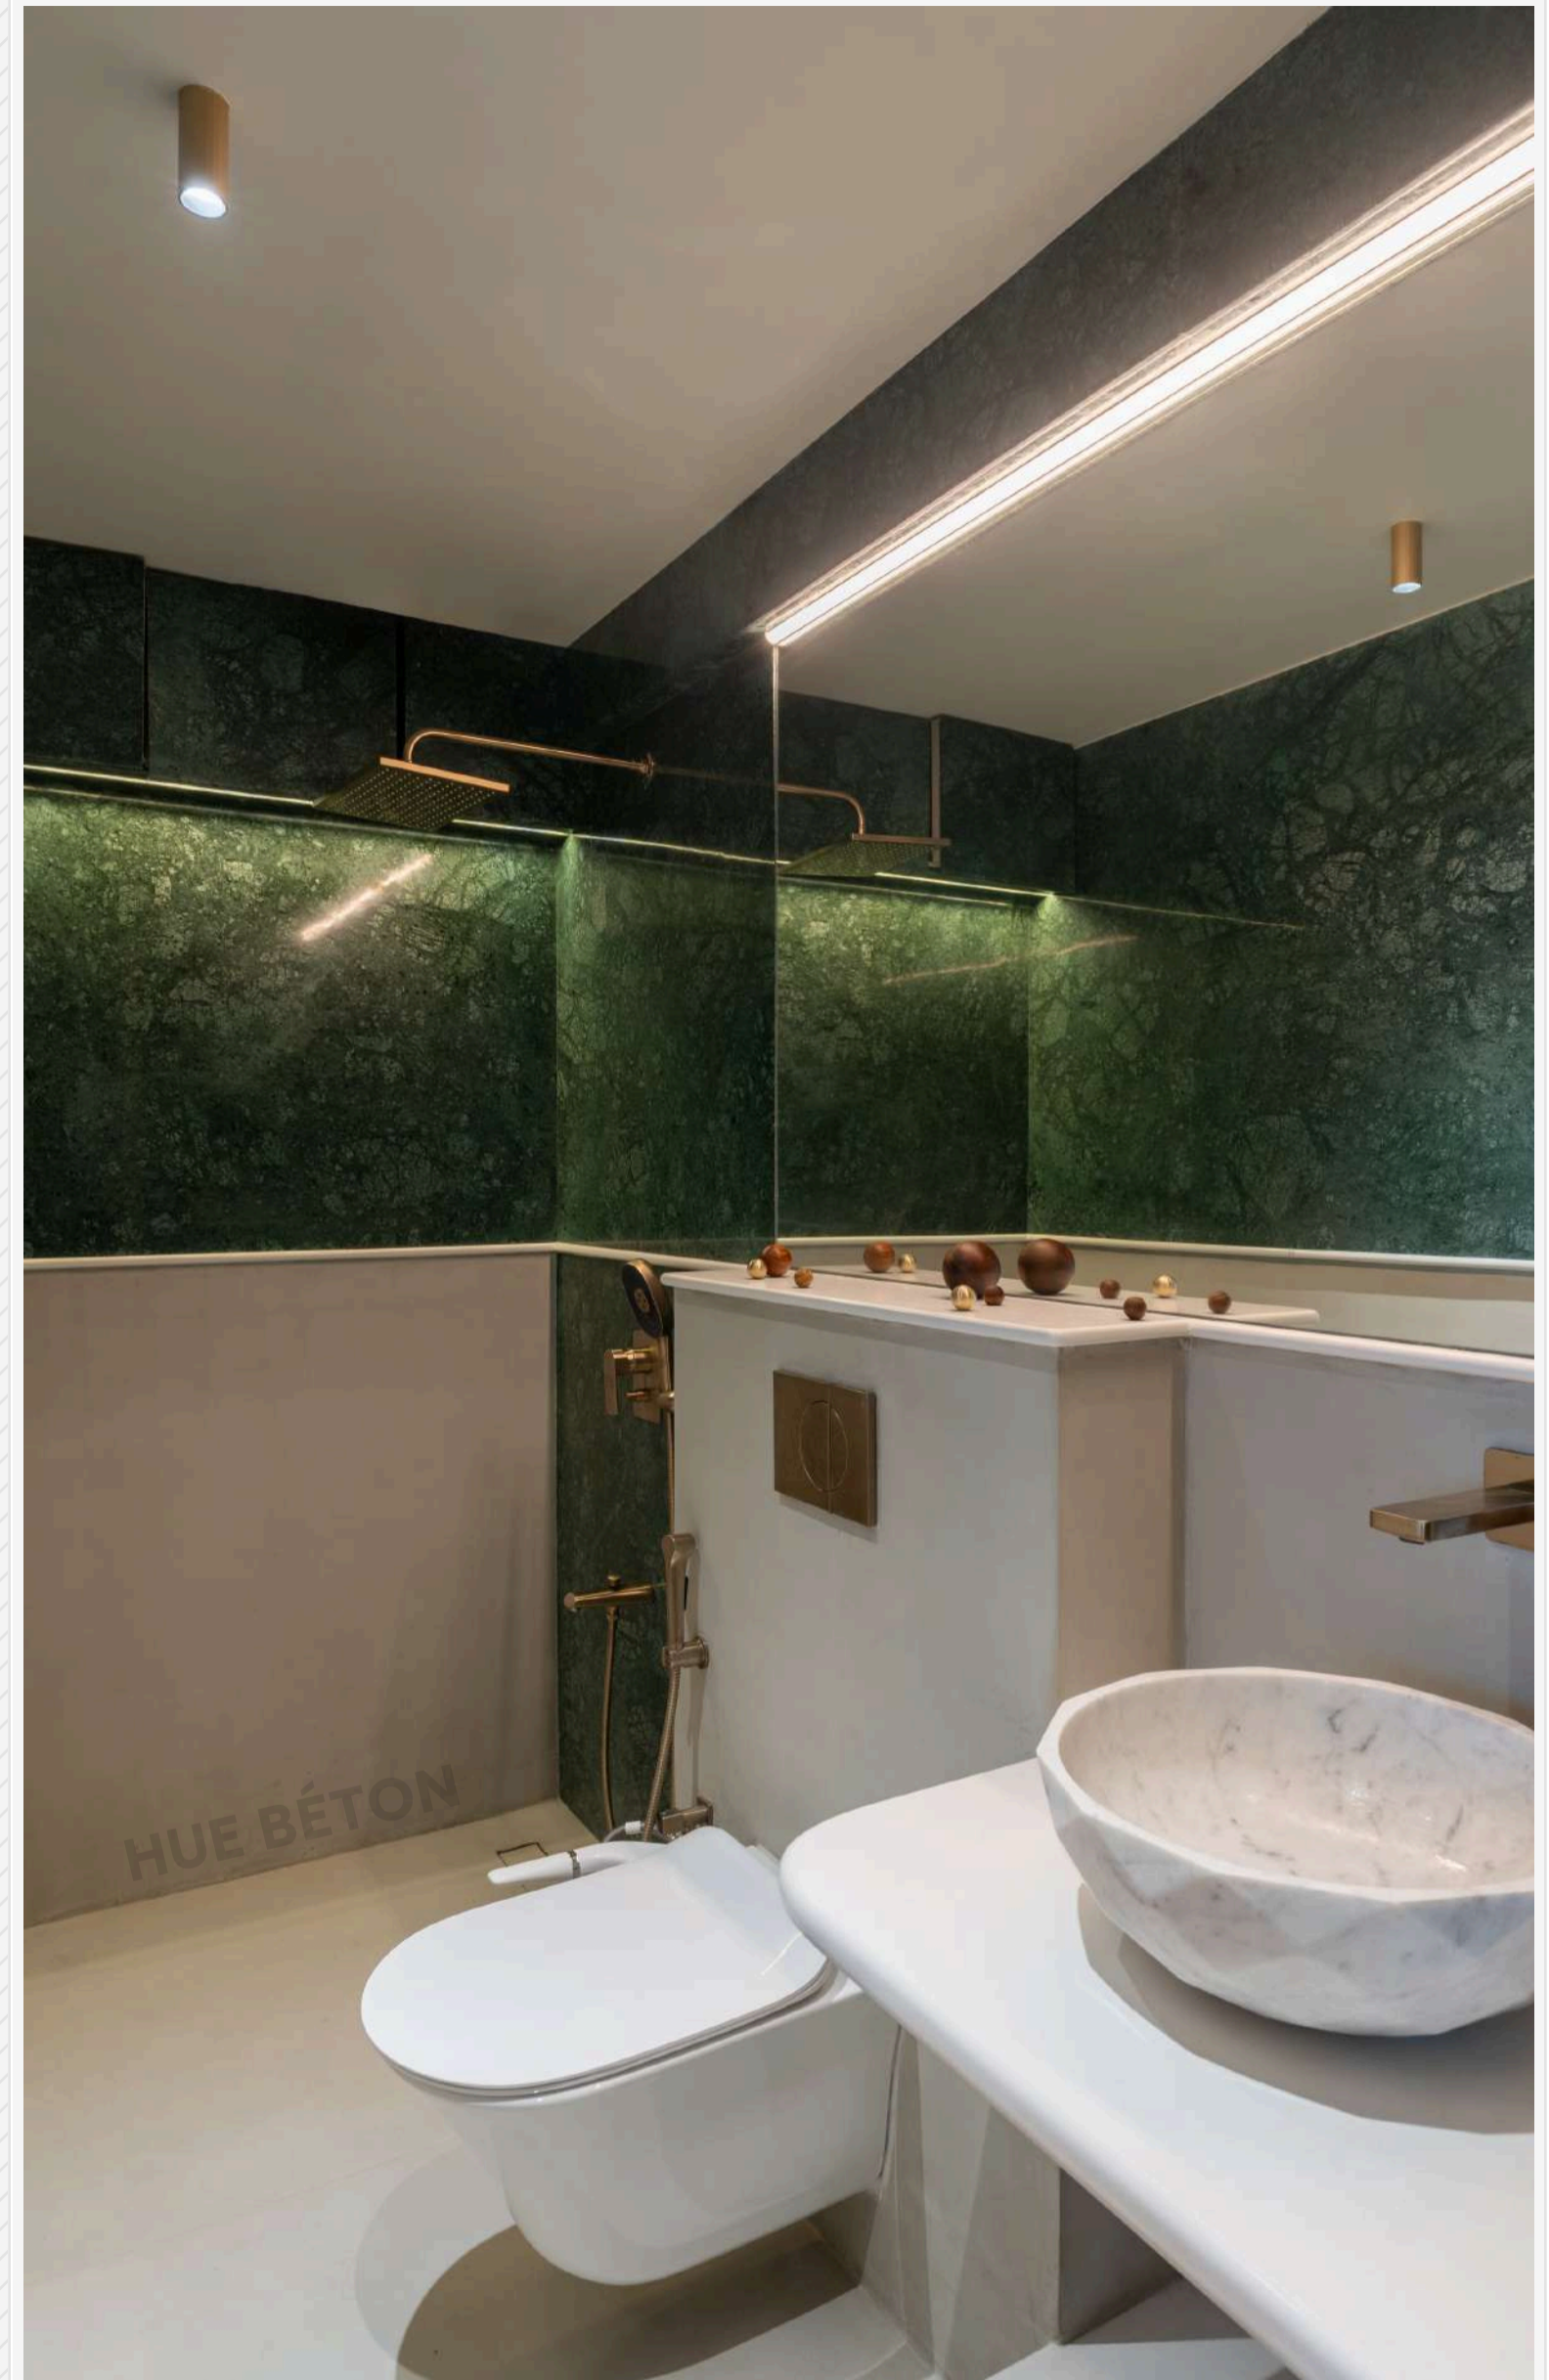

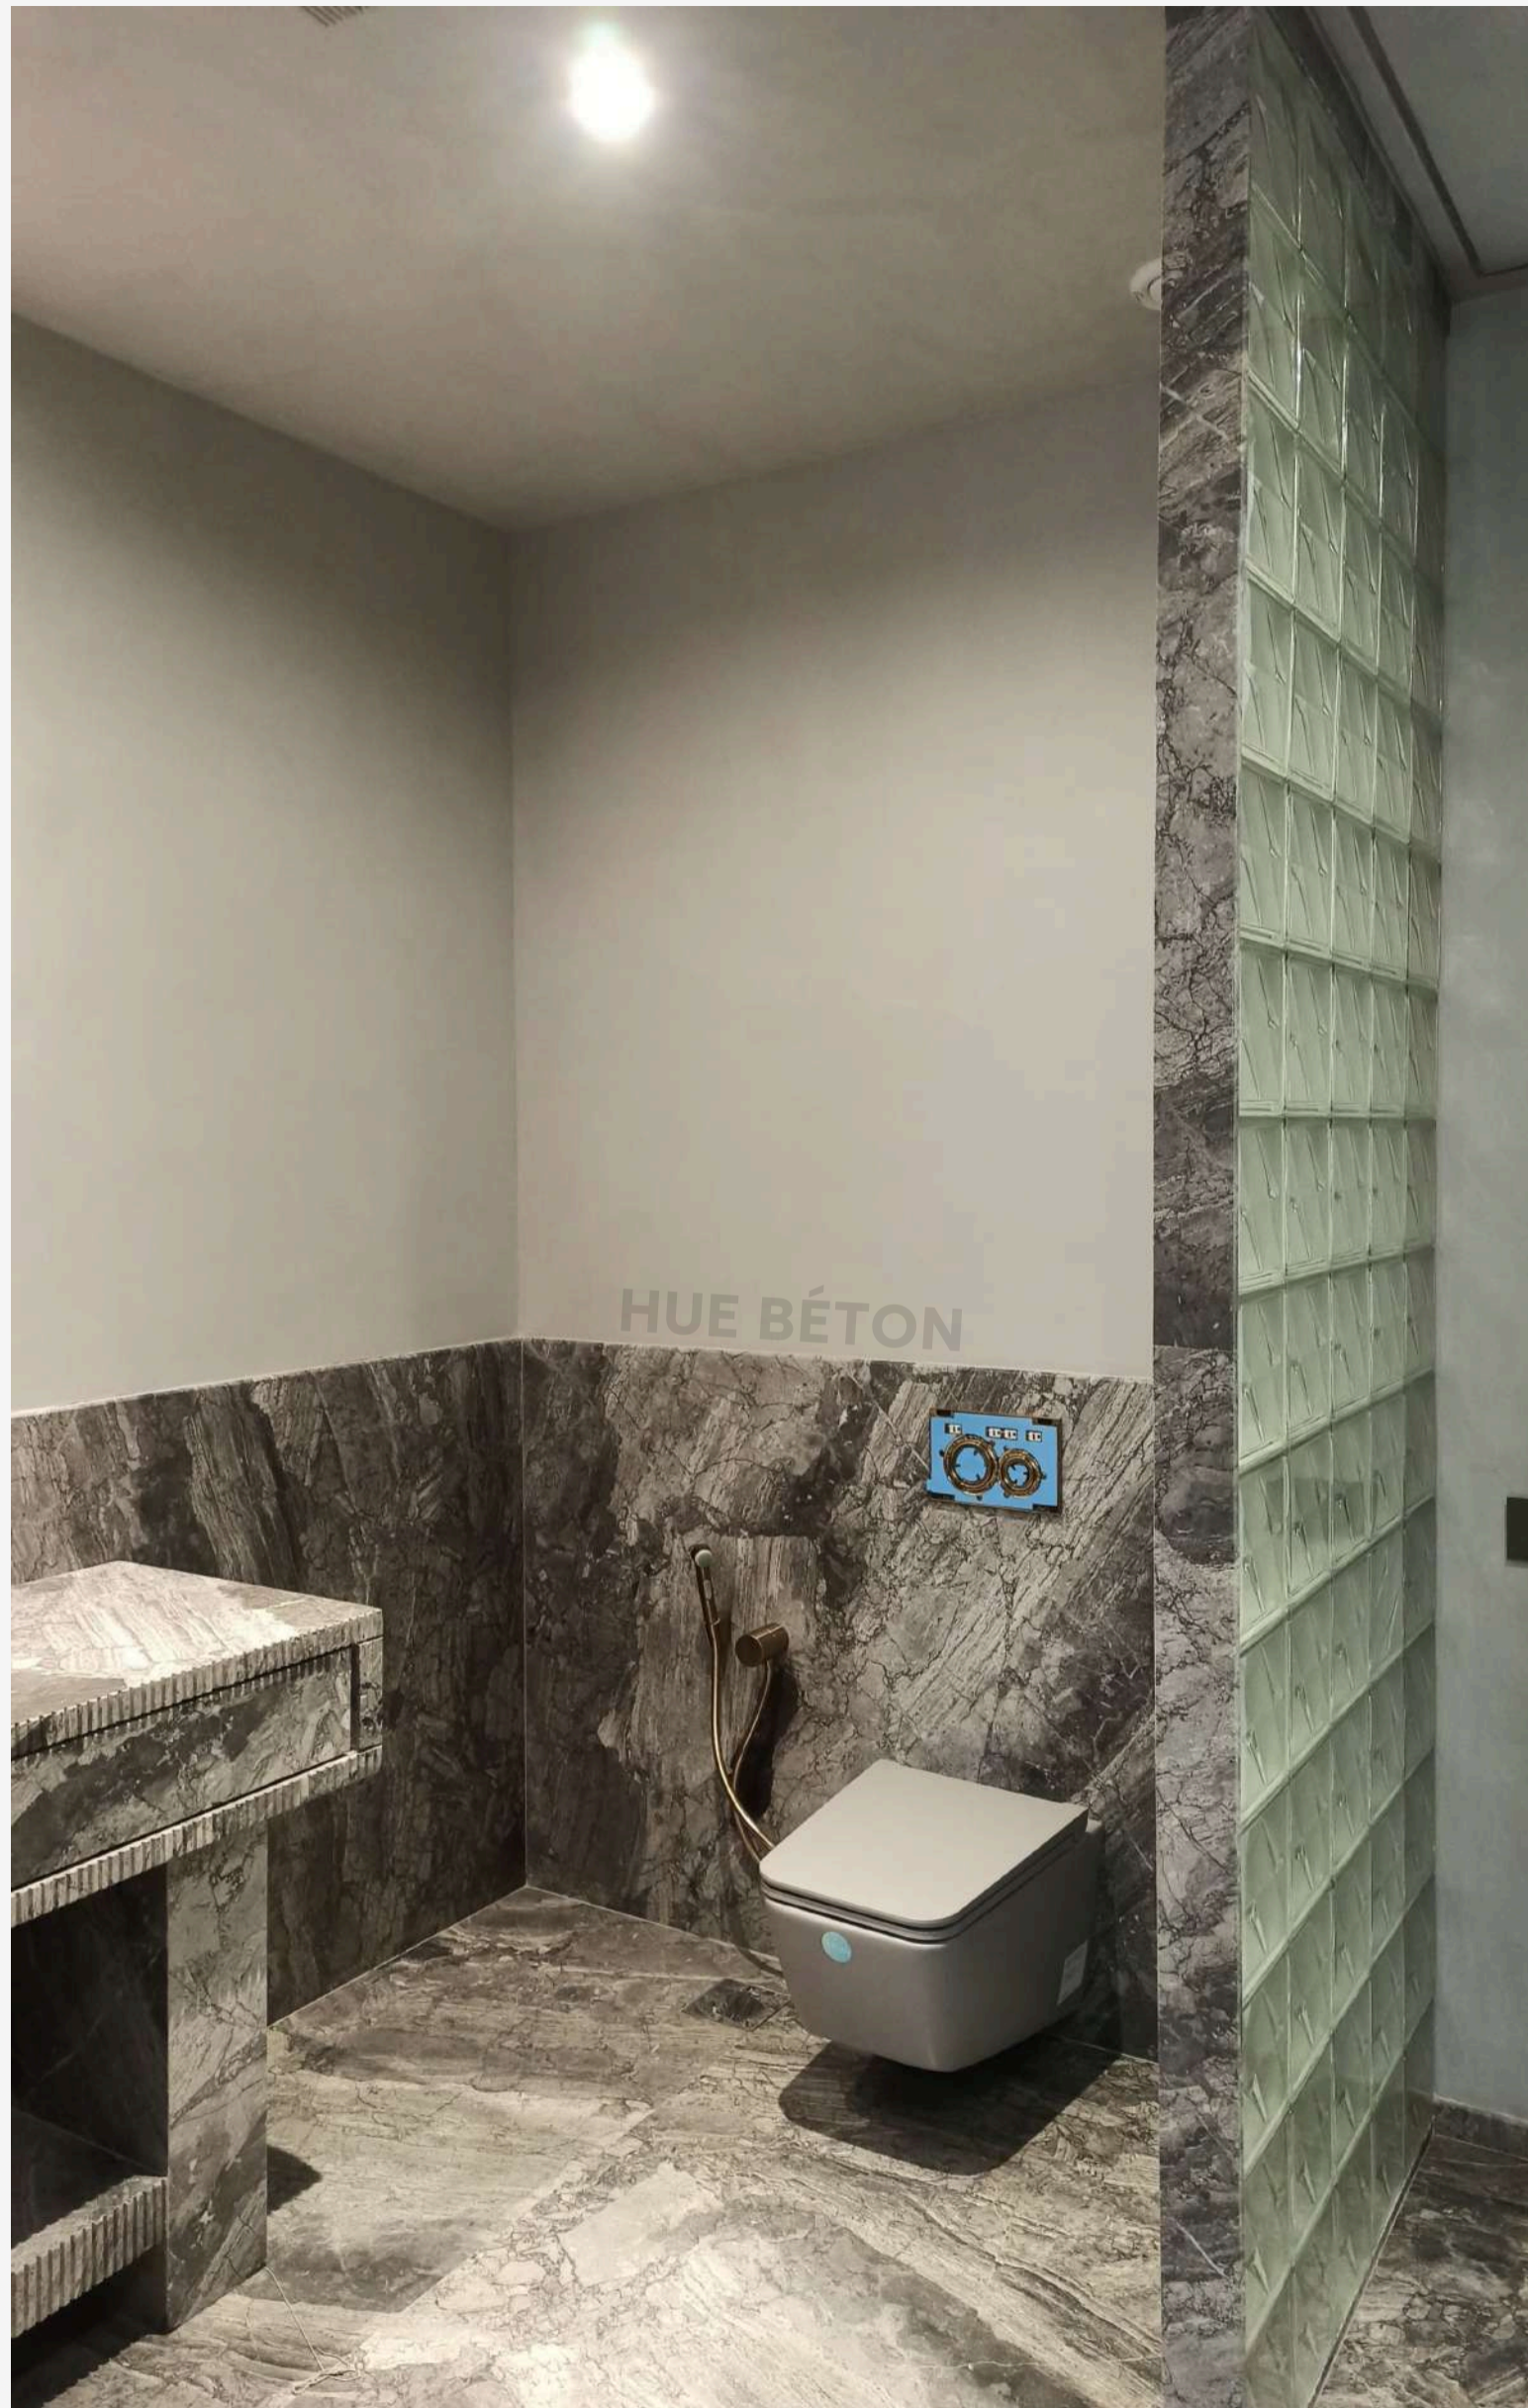

Bathrooms

Perfect for wet areas, our micro concrete solutions offer water-resistant, stain-proof, and hygienic surfaces. Ideal for bathrooms, kitchens, and backsplashes, they combine functionality with a sleek, modern finish that elevates your space.

Furniture

Give surfaces a distinctive edge with handcrafted micro concrete countertops and furniture. Resistant to stains and scratches, they bring an industrial-chic aesthetic while maintaining durability and easy upkeep—perfect for kitchens, vanities, and custom-designed furniture pieces.

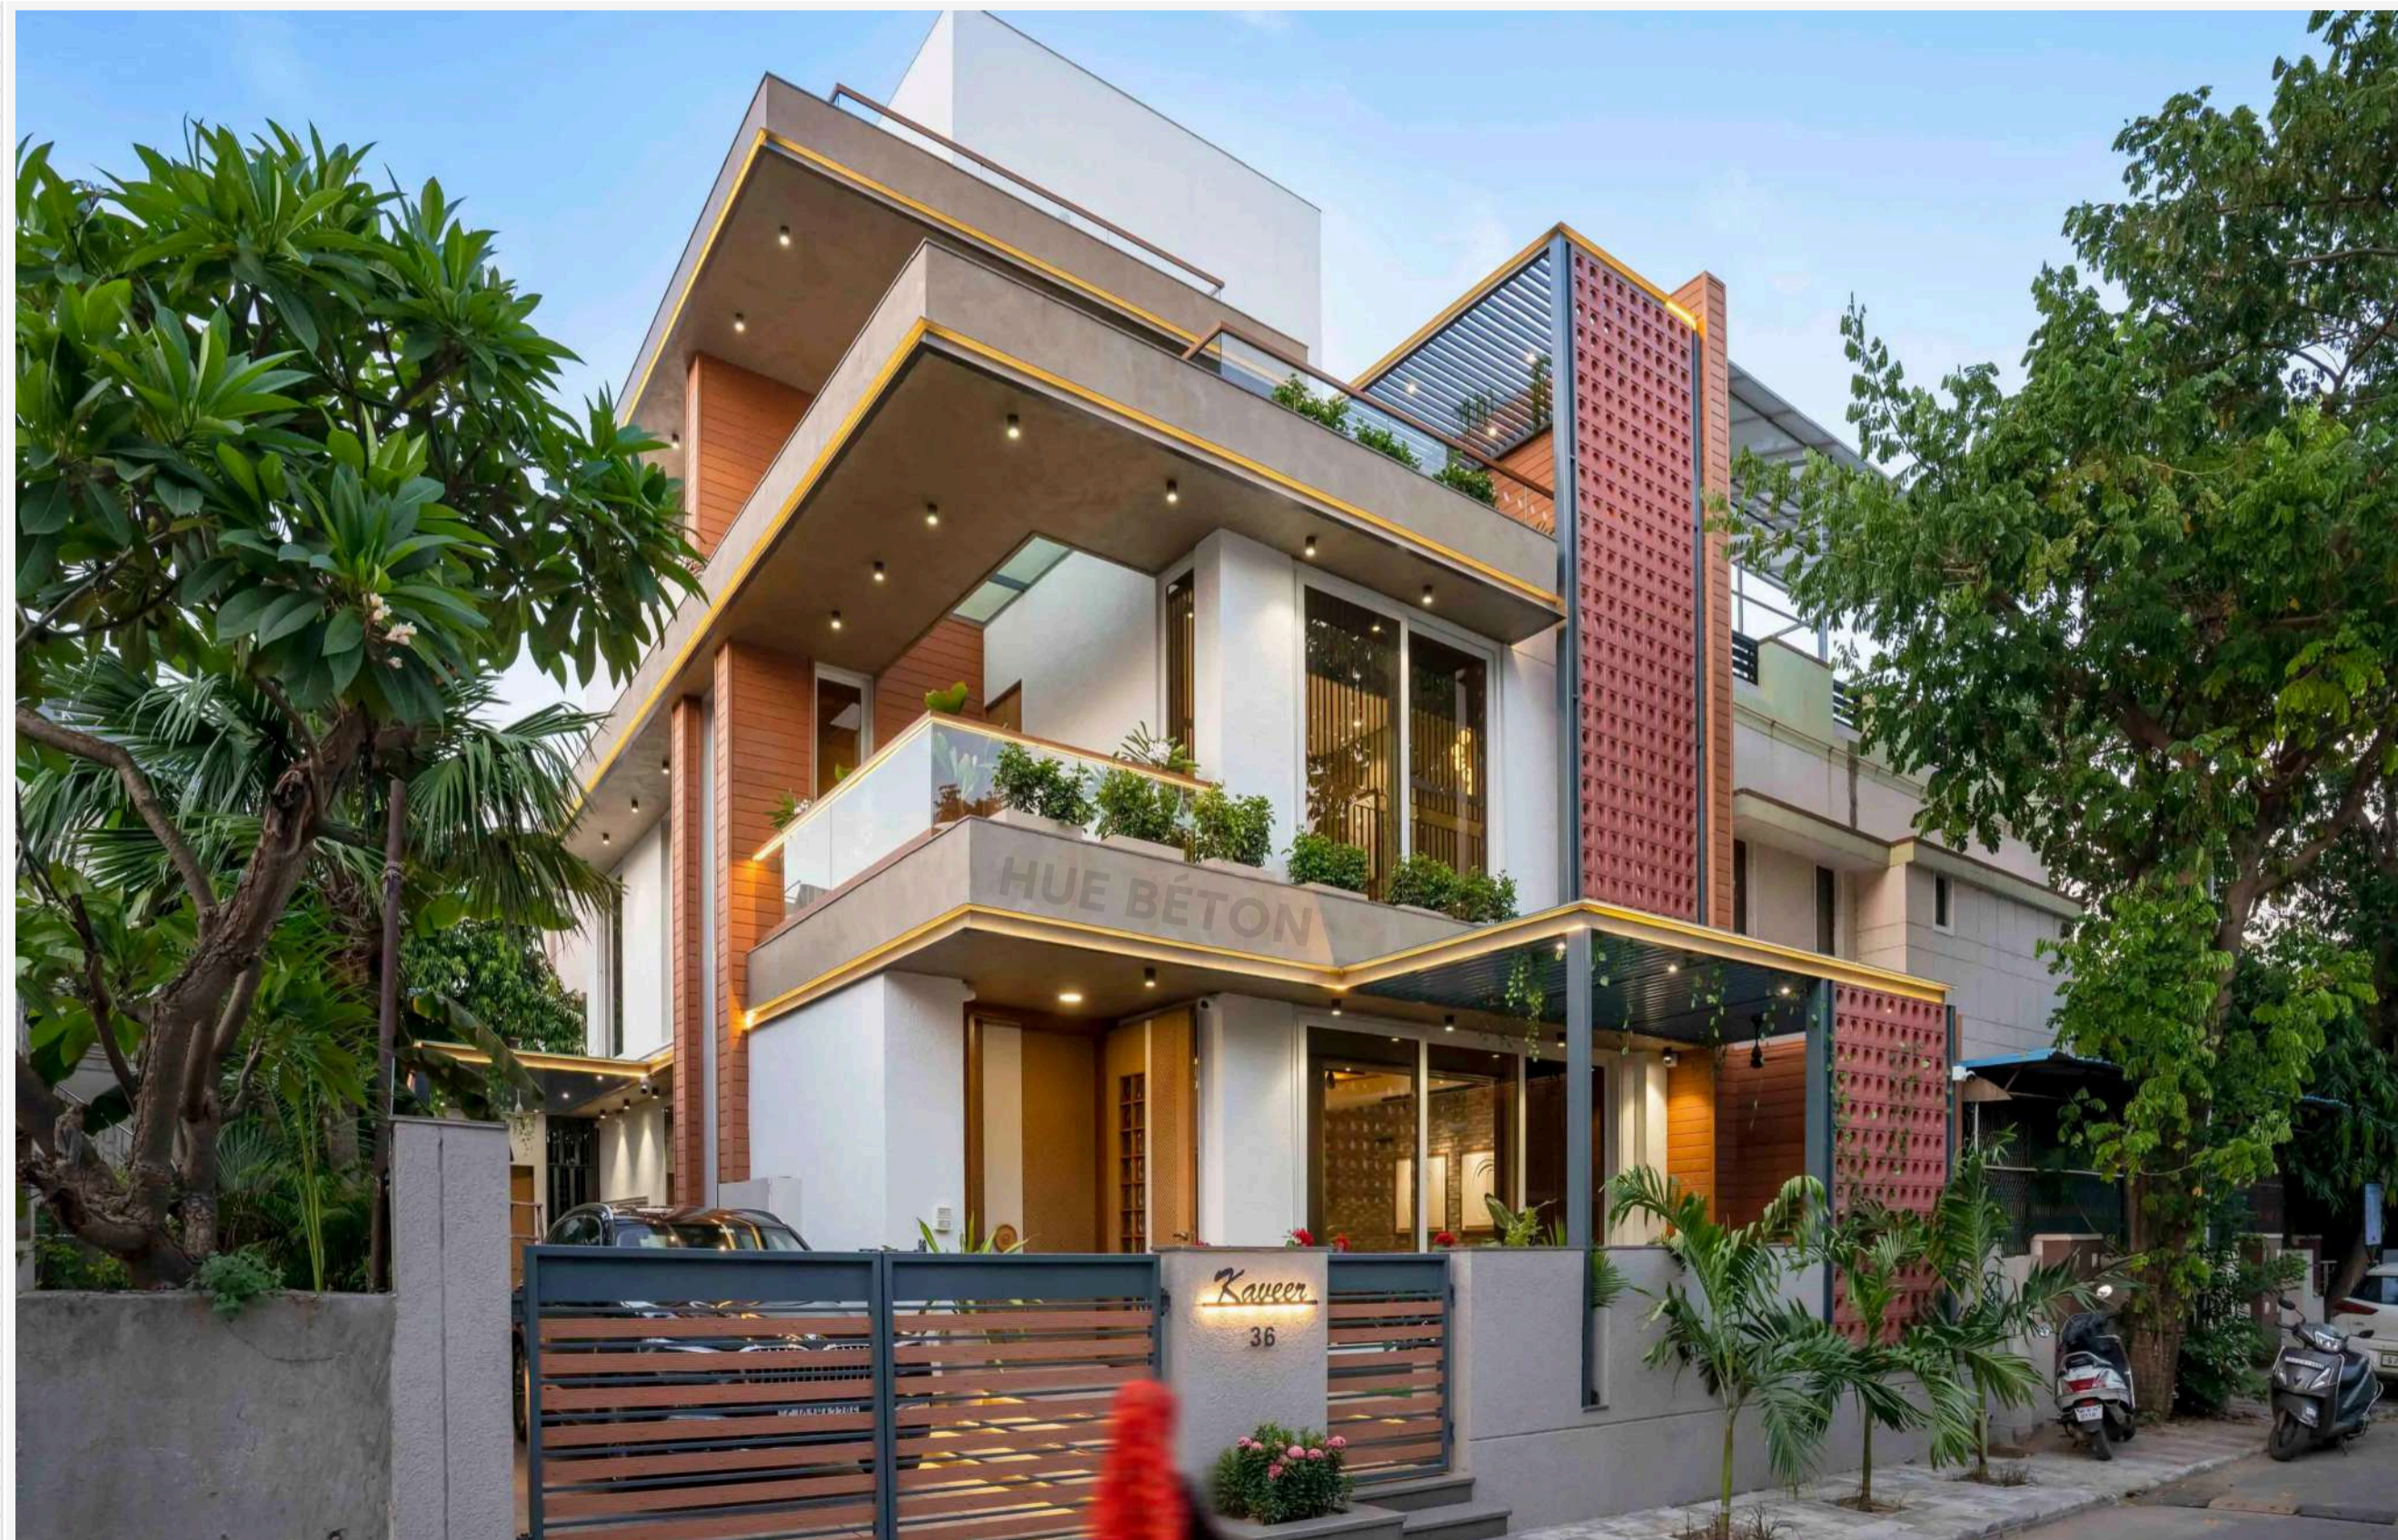

Outdoor & Facades

Micro concrete isn't just for interiors—it's built to withstand the elements. Our weather-resistant finishes enhance outdoor spaces, facades, patios, and exteriors with a sleek, modern look while offering superior durability and protection against moisture and wear.
